

RAS 201 TREAD BUILDER

The new RAS 201 Builder is designed for lower volume plants that do not have the need for a full automatic builder, but yet require the same quality that we have come to expect from Matteuzzi.

- PLC – controlled semi-automatic builder
- Works with or without cushion gum
- Automatic build cycle
- Tread lift to load tread rubber
- Enclosed area for poly collection
- Adjustable cutting cycle for small treads
- Totally automatic stitching to do all tires and tread with or without wing
- Dwell button for stitching shoulder and wings, if needed
- Work tray and cement can holder
- Complete manufacturers' parts and service backup

Tire sizes – 14" – 24.5" (including 445/65R22.5)

Requirements:

Electrical:

460 Volts

10 Full Load Amps

Air:

3/8" Supply Line

150 PSI Max
