

# BCB 40

## TRUCK TYRE COMPUTERIZED BUFFING MACHINE

THE MACHINE CAN PROVIDE ANY BUFFED PROFILE based on the following parameters:

### BCB 40

allows the following operating modes

- **AUTOMATIC MODE** The operator selects the appropriate buffing program, loads and inflates the tyre casing and starts the buffing cycle.
- **MANUAL START MODE** The operator selects the appropriate buffing program, loads and inflates the tyre casing and moves the buffing head towards the tyre casing by joystick.
- **SEMI AUTOMATIC MODE** The semi-automatic cycle is similar to the *manual start mode* but the machine also provides a joystick to move the buffing head transversally towards the left and right tyre shoulders.
- **FLY CYCLE**

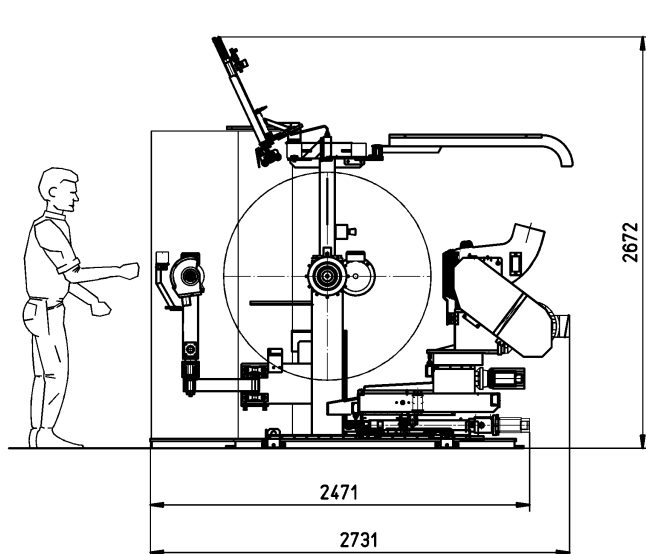

- 15" colour touch screen user interface. The industrial PC provides two USB ports for data backup and software updating.
- Mechanical circumference measurement.
- Magnetic steel belt sensor.
- Programmable blade wear compensation.
- Articulated buffing/brushing arm is available on request.
