## RAS 650-T

- Tension builder so tread is applied under tension for better performance and ride.
- Tread matching – matches the tread design to the pitch mark of the mold so the tread pattern is a perfect match.
- Builds precut treads or 11 meter treads.
- Laser control to measure tire diameter to put on the correct tread length so there is a perfect splice.
- Settings for different tread types and compounds when needed.
- Automatic cycle.
- Laser controlled automatic starting point for tread application.
- Tread lift.
- Motorized poly pull off.
- Stitching cycle for normal and wing treads.
- Can be used with calendar cushion, if needed.
